Let's Start!

Let's review!

Learning Outcome

Identify and describe events in the news in a range of social and work contexts.

Can Do Statements

- I can discuss how to deal with problems.
- I can ask for help or advice.
- I can exchange opinions.

Ask your partner:

- How was your week? How did you feel? Relaxed? Nervous?
- What did you do this week to help the environment? What are you planning to do next week?

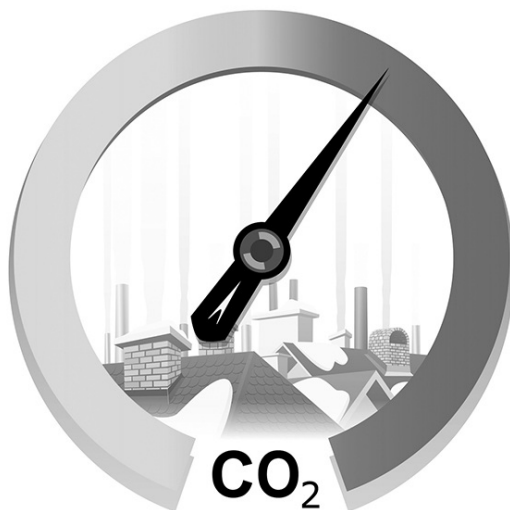

Let's Explore!

Sally and Vanessa talk about what they can do to make a difference. It's an **uphill*** struggle!

* An "uphill" struggle is a very difficult battle.

Instructions: Read the text aloud.

- Sally:** Hey V. My week was so depressing! I talked to a few environmentalists who are raising awareness about climate change. They told me how the pesticides that have been released into the water by chemical companies are actually causing irreparable damage to the environment.
- Vanessa:** That sounds terrible! Do you know what we can do to avoid this disaster?
- Sally:** We should stop wasting so many resources. If we don't change our behavior immediately, many species of wildlife will face extinction.
- Vanessa:** I read about some programs that tackle this problem. I joined a group of restaurant owners and managers who stopped buying meat that was produced by farms releasing high levels of pollutants.
- Sally:** More people should know about the food they eat.
- Vanessa:** Yeah. If people read the labels, they would stop buying certain products. If I spent less time at the restaurant, I would feel more involved with the problems which we're facing globally. Maybe I should get out more.
- Sally:** Trust me, if you knew about weather patterns the way I do now, you wouldn't want to go outside!
- Vanessa:** Can you tell me what I should do to make a difference?
- Sally:** No idea! I was asked the same question by many of my readers this week. I should come up with an answer, I guess.

Let's Practice!

Could you tell me what it means to be an environmentalist?

Instructions: Underline all the incorrect words in the sentences. Rewrite the sentences correctly below. Practice saying them aloud with a partner. Correct each other.

1) Can you tell me what I should to say to people who don't believe in climate change?

2) Do you knows what we can do to avoid this disaster?

3) Can you tell to me what I should do to make a difference?

4) Do you understand who the effects of climate change are to the environment?

5) Could you explain to I what being green means to you?

Let's Practice!

Sally and Vanessa discuss how to deal with environmental issues.

Instructions: Proofread the sentences. Cross out the incorrect words. Rewrite the sentences. Use capital letters where necessary.

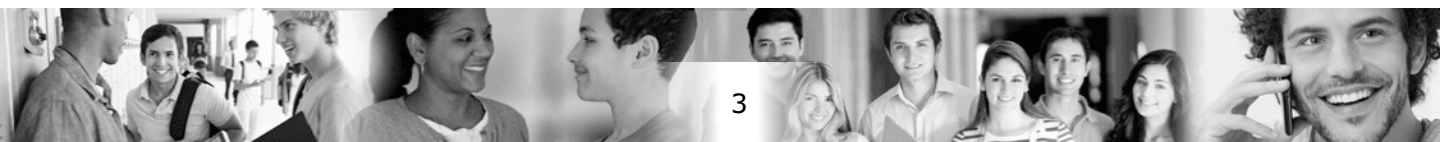

1. I ought talk to a few environmentalists who is raising awareness about climate change.

2. Pesticides that have been released into the water by chemical companies are damaged the environment.

3. I should to read about some programs that tackle this problem. I need to be more involving .

4. I read a depressed article about the pollutants released by the farms we buy our meat from.

5. The book I read about climate change suggests we need to cut CO2 emissions in half in order to avoid irreperable damage to the environment.

Extension Activity

Write about a famous scientist.

Instructions: Complete the following steps. Fill in the Self-Assessment.

- Choose a famous scientist and research them on the Internet.
- Write 10 to 12 sentences about the scientist.
- Use adjective clauses to write about the main events in the person's life.
- Add 4 to 6 details.
- Exchange your work with a partner.
- Review their work and add more details.

Self-Assessment

Yes

No

I express complex statements using words like *who*, *that* or *which*.

☐
☐

I identify information and extract important details.

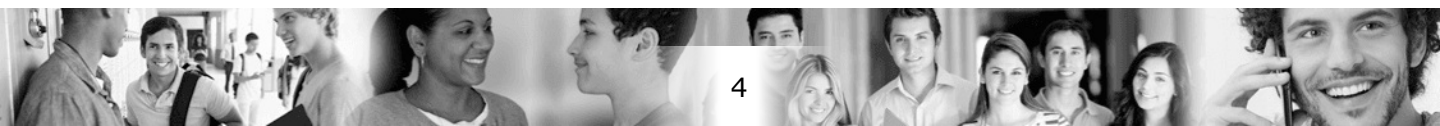

☐
☐

I review other people's work and offer suggestions.

☐
☐

Target Words

- **environmentalist** (noun): a person who advocates the protection of the environment
e.g. Environmentalist groups are protesting the construction of this new highway.
- **climate change** (noun): a change in global weather patterns largely caused by pollution
e.g. John Smits is the head of a climate change activist group.
- **pesticide** (noun): a substance used to destroy insects and other harmful organisms
e.g. She found out that a local government agency sprayed an enormous amount of pesticide.
- **irreparable** (adjective): impossible to repair
e.g. Would you say that irreparable damage was done by the previous generation?
- **extinction** (noun): the process of a species dying out
e.g. If we don't do anything, more animals and plants will face extinction.
- **disaster** (noun): an accident that causes great damage and loss of life
e.g. If we keep the lake in its current state, we will face an ecological disaster.
- **weather pattern** (noun): weather conditions that repeat themselves on a regular, predictable basis
e.g. The weather patterns have been changing recently.
- **to tackle** (verb): to make an effort to deal with something
e.g. Our refusal to tackle the problem of carbon gas emissions has not helped the situation.
- **globally** (adverb): involving the entire world
e.g. Natural disasters have increased globally.
- **pollutant** (noun): a toxic substance released into the atmosphere or in the water
e.g. Pollutants pose a threat to our freshwater lakes.

Learning Points

Discussing How to Deal With Problems

When you want to offer advice or give solutions to a problem, you use modals like *might*, *should* or *could*.

You use the First Conditional sentences with *If* clauses to talk about real possibilities in the future.

You use the Second Conditional to talk about unreal or imaginary (hypothetical) situations in the future.

The modals can go at the beginning of the sentence, or after a clause starting with "*If ...*"

Example:

If ... , I would/I wouldn't ...

If ... , you could/should ...

You use the First Conditional to say it's possible that you will do or not do something. In that condition, something else may, will or will not happen.

The parts of the sentence are divided into two clauses: the *If* clause and the *Condition* clause.

You use the Second Conditional to talk about hypothetical situations. It's not certain that it's possible to fulfill the condition.

Example:

If I had a million dollars, I would buy a car.

Do you have a million dollars? No.

Is it possible to suddenly get a million dollars? Not really.

What would you do if you had a million dollars? Buy a car.

Examples:

- *If we don't change our behavior immediately, many species of wildlife will face extinction.*
- *If I spent less time at the restaurant, I would feel more involved with environmental issues.*

Learning Points

Asking for Help or Advice

There are several ways to ask for help or advice in English. You can use polite and casual language to do this. Let's look at one particular structure for asking for help or advice.

You can use the structure:

Can / Could / Do + you + verb + me (optional) + question word

Example:

Do you know what we can do to avoid this disaster?

Can you tell me what I should do to make a difference?

These questions are often used in interviews. You ask this type of questions when you want to know more about a topic.

Can / Could / Do	you	verb	(me/us)	question word
<i>Can</i>	<i>you</i>	<i>tell</i>	<i>me</i>	what <i>I should do to make a difference?</i>
<i>Do</i>	<i>you</i>	<i>know</i>		what <i>we can do to avoid this disaster?</i>
